PAMELA RAFFOUL

Techno-Functional Salesforce Consultant

Dbayeh, Mount Lebanon Governorate, Lebanon | pamelaraffoul1@gmail.com | +961 81 249 917 | linkedin.com/in/pamela-raffoul2002

PROFILE

Techno-functional Salesforce Consultant with nearly 3 years of experience at an IT consulting firm, delivering Sales, Service and Experience Cloud solutions across multiple client projects. Combines hands-on development in Apex, Lightning Web Components, and REST integrations with business analysis, from requirements workshops to UAT. Promoted to Confirmed Consultant after two years. Quick to adapt to new systems and roles, and enjoys solving complex problems in collaborative teams.

PROFESSIONAL EXPERIENCE

EI-Technologies Lebanon — Awkar, Lebanon

Confirmed Salesforce Consultant | Jan 2026 – Present

- **Techno-Functional Consulting:** Gathered requirements directly from stakeholders and business users, translated them into technical solutions, and implemented them end to end on the Salesforce platform.
- **Delivery & UAT Support:** Documented each solution, delivered demos to stakeholders, and supported end users during User Acceptance Testing, and provided go-live support.
- **Integration Business Analysis:** Run workshops with stakeholders to gather business requirements and translate them into Jira tickets for the development team.
- **UAT Validation:** Validate delivered features against business requirements during UAT and follow up on issues with the team.

Junior Salesforce Consultant | Jan 2024 – Dec 2025

- **Custom Development:** Developed Lightning Web Components and Apex classes, triggers, and batch jobs to extend standard platform functionality.
- **Integrations:** Developed Apex REST integrations between Salesforce and external systems.
- **Experience Cloud Sites:** Built reusable LWC components for two Experience Cloud sites, reducing duplicated components across pages.
- **Platform Configuration:** Configured Flows, Assignment and Escalation Rules, Email-to-Case, profiles, roles, permission sets, reports, and dashboards across Sales and Service Cloud.
- **Testing & Deployment:** Wrote Apex test classes and performed functional validation before production deployments.
- **Microsoft Power Platform:** Built SharePoint, Power Apps, and Power Automate solutions on first client project.
